

CTC Source Protection Committee Member - Biography

Maria Topalovic

Aggregate Sector

Maria is passionate about healthy and sustainable communities. She has always been interested in water management and water policy, which was part of her studies at McMaster University, where she completed a Bachelor of Chemical Engineering and Management in 2008 and a Master's of Engineering and Public Policy in 2010.

Maria works for CRH Canada Group Inc. as an environment manager, supporting the US Great Lakes, Ontario and Western Canada Regions on environment, stakeholder relations and sustainable development.

Maria is an active volunteer. She is a member of the Ontario Stone, Sand and Gravel Association's Environment Committee, the CTC Source Protection Committee, and a board member for the Hamilton Conservation Authority. She has also served on committees with Concrete Ontario and the Canadian Cement Association.

Maria volunteers in her local community in Hamilton, where she contributes to sustainability education, community engagement and healthy city building. She is a coach for the FAB Foundation that supports fitness and leadership development in young women. When Maria isn't working or volunteering she loves to play soccer, snowboard, take a yoga class and run.
