

## CTC Source Protection Committee Member - Biography

**Michael D'Andrea**

**Municipal**

Michael D'Andrea is the Director of Water Infrastructure Management with the City of Toronto.

He has over 34 years' of experience in the water and wastewater services industry having worked in engineering consulting and the Ontario Ministry of the Environment in support of the bi-national Remedial Action Plan Program, before joining the City of Toronto in 1997.

In his current role, Michael is responsible for asset management, infrastructure planning, capital programming and policy development in support of the City of Toronto's water, wastewater and stormwater infrastructure, valued at an estimated \$26 billion. He is responsible for the development of Toronto Water's annual capital budget.

He has led a number of environmental stewardship initiatives including the City's innovative Water Efficiency Plan directed at achieving in-system capacity and deferring infrastructure expansion to support future growth needs, and the development of the City of Toronto's Wet Weather Flow Master Plan directed at addressing the impacts of storm sewer and combined sewer overflow discharges and improving water quality within the City's six watersheds and the waterfront. The Plan's 25 year implementation schedule represents an investment of over \$1 billion.
