

Item 6.4

**TO: Chair and Members of the Source Protection Committee
Meeting #4/09, May 26, 2009**

FROM: Working Group Chair

**RE: CLOSPA Significant Groundwater Recharge Areas –
Recommendations to SPC on outcomes from the Ad Hoc
Working Group.**

KEY ISSUE: Report to be distributed at SPC Meeting #04/09.

RECOMMENDATION

THAT the SPC receives this report for information

BACKGROUND

At CTC Source Protection Committee (SPC) Meeting #02/09, held on Tuesday, February 17, 2008, the SPC by Resolution #91/09 mandated the Ad Hoc Working Group be expanded to recommend the appropriate approach to delineate Significant Recharge Areas in the TRSPA and CLOSPA.

On Wednesday, May 20, 2009 members of this Ad Hoc working group met to review mapping and Significant Recharge Area recommendations from CLOSPA. At the conclusion of this meeting the Ad Hoc Working Group felt that they required an opportunity to review mapping options for the TRSPA before recommending a mapping option for CLOSPA.

The Tier 1/2 Water Budget for TRSPA is currently under peer review. Upon completion of this peer review staff will bring the report forward to the Ad Hoc Working Group for their consideration. The Ad Hoc Working Group will report back on recommendations at the earliest possible opportunity.
